SKU #:	WHSL464

Trouble Shooting Tips:

If your solar light does not turn on at night, it may be caused by the following:

1. Check to see if the switch is in the "OFF" position.
Resolution: Push the switch to the "ON" position and allow the solar light to be charged for at least 8 hours in direct sunlight.
2. Battery may not be fully charged.
Resolution: Make sure the solar light is placed in an area where the solar panel receives the maximum amount of full direct sunlight every day.
3. The solar light may be located too close to other light sources (such as porch light or street lantern).
Resolution: Relocate away from external light source.
4. The rechargeable battery may need to be replaced.
Resolution: Replace with batteries of identical specification.
